

Association between State Medicaid Expansion Status and Health Outcomes During the COVID-19 Pandemic

Appendix

Appendix Figure A1. Pre- and Post-COVID-19 Pandemic Means of Outcome Variables by State Medicaid Expansion Status

Source: Authors' calculations based on Behavioral Risk Factor Surveillance System (BRFSS) 2016-2020.

Notes: Sample includes respondents aged 19-64 with household incomes below 138% of the federal poverty level (N=179,135). Figures present means for expansion and non-expansion states in the pre-COVID period (January 2016 to February 2020) and the post-COVID period (March 2020 to December 2020). Estimates account for BRFSS survey weights.

Appendix Table A1. State Classifications

State (1)	Medicaid Expansion State? (2)	Mask Mandate Implementation Date (3)	COVID Severity (4)
Alaska	Yes	4/24/2020	Below Average
Arkansas	Yes	7/20/2020	Above Average
Alabama	No	7/16/2020	Above
Arizona	Yes	n/a	Above
California	Yes	6/18/2020	Above
Colorado	Yes	7/16/2020	Below
Connecticut	Yes	4/20/2020	Above
Delaware	Yes	4/28/2020	Above
District of Columbia	Yes	4/17/2020	Above
Florida	No	n/a	Above
Georgia	No	n/a	Above
Hawaii	Yes	4/20/2020	Below
Idaho	Yes	n/a	Below
Illinois	Yes	5/1/2020	Above
Indiana	Yes	7/27/2020	Below
Iowa	Yes	n/a	Above
Kansas	No	7/3/2020	Below
Kentucky	Yes	5/11/2020	Below
Louisiana	Yes	n/a	Above
Maine	Yes	5/1/2020	Below
Maryland	Yes	4/18/2020	Above
Massachusetts	Yes	5/6/2020	Above
Michigan	Yes	4/27/2020	Above
Minnesota	Yes	7/24/2020	Below
Mississippi	No	n/a	Above
Missouri	No	8/5/2020	Below
Montana	Yes	n/a	Below
Nebraska	No	6/26/2020	Above
Nevada	Yes	6/26/2020	Above
New Hampshire	Yes	n/a	Below
New Jersey	Yes	4/8/2020	Above
New Mexico	Yes	5/15/2020	Below

New York	Yes	4/17/2020	Below
North Carolina	No	n/a	Above
North Dakota	Yes	n/a	Below
Ohio	Yes	7/23/2020	Below
Oklahoma	No	n/a	Below
Oregon	Yes	7/1/2020	Below
Pennsylvania	Yes	7/1/2020	Below
Rhode Island	Yes	4/18/2020	Above
South Carolina	No	n/a	Above
South Dakota	No	n/a	Below
Tennessee	No	n/a	Above
Texas	No	7/3/2020	Above
Utah	Yes	4/10/2020	Above
Vermont	Yes	8/1/2020	Below
Virginia	Yes	5/29/2020	Below
Washington	Yes	6/26/2020	Below
West Virginia	Yes	7/7/2020	Below

Raifman J, Nocka K, Jones D, Bor J, Lipson S, Jay J, and Chan P. (2020). “COVID-19 US state policy database.” Available at: www.tinyurl.com/statepolicies.

Notes: Column (2) describes states’ Medicaid expansion status. We define states that implemented Medicaid expansion by July 2020 as expansion states; states labeled “yes” are expansion states, and states labeled “no” are not expansion states. Column (3) contains the date a state first implemented a mask mandate in 2020. Column (4) describes a state’s COVID-19 severity. We determine the severity using a state’s cumulative case rate as of July 2020; states labeled “above” have case rates above the national average, and states labeled “below” have case rates below the national average.

Source: Authors' calculations based on Behavioral Risk Factor Surveillance System (BRFSS) 2016-2020.

Notes: Each column displays coefficient estimates and 95% confidence intervals for a different regression. Sample includes respondents aged 19-64 with household incomes below 138% of the federal poverty level (N=179,135). Regressions control for respondents' demographic characteristics (including age, race/ethnicity, educational attainment, employment status, sex, marital status, parental status, household size, and whether the respondent was part of BRFSS's cell phone sample), state unemployment rate, state of residence, and quarter-year of interview. Estimates account for BRFSS survey weights, and standard errors are clustered by state.

Appendix Table A11. Medicaid Policies During COVID-19 Pandemic in 2020

Policy	Summary
Families First Coronavirus Response Act	Medicaid enrollment increased by 9 million from February 2020 to January 2021, primarily driven by pandemic-related job losses in March-June 2020 and by the Families First Coronavirus Response Act. The Families First Coronavirus Response Act mandated continuous coverage, prohibiting states from disenrolling Medicaid beneficiaries during public health emergencies. Relatedly, studies estimate that if the public health emergency ends when expected in 2022, Medicaid enrollees will decline by 15 million due to the repeal of mandated continuous coverage (Buttegens & Green, 2021).
Telehealth Coverage	Before the pandemic, coverage of telehealth services by Medicaid varied widely by state; however, at the onset of the COVID-19 pandemic in 2020, states expanded access to telehealth through Medicaid. These adjustments included expanding the Medicaid populations who can use telehealth, expanding the services deliverable by telehealth, adjusting payment rates and cost-sharing of telehealth services, expanding the technologies used to deliver telehealth, allowing more types of distant and originating sites, and expanding provider types that may provide telehealth services. Although coverage varied by state in 2020 (and continues to vary), Medicaid programs in all 50 states and DC reimbursed some type of live video visit (Guth & Hinton, 2020).
Medicaid emergency authorities	Beginning in March 2020, states used Medicaid emergency authorities, such as Medicaid Disaster Relief State Plan Amendments (SPAs) and other administrative actions, to address the COVID-19 public health emergency. SPAs allow states to make temporary changes to their Medicaid plans, managing access and coverage issues during the COVID-19 crisis. States made temporary changes regarding eligibility, enrollment, premiums and cost-sharing, benefits, prescription drugs, and payments (Kaiser Family Foundation, 2021).

Notes: This table describes key policy changes related to Medicaid during the COVID-19 pandemic in 2020, which is the only pandemic year included in our study period.
